SAFETY INFORMATION	
1. Identification of Hazards	Adjustable hinges do not pose a risk to health or safety when used as intended and properly installed and adjusted. During installation and use, caution should be exercised as hinges may have sharp edges, heavy moving parts, or adjustment mechanisms that can pose risks of pinching, impact, or cuts.
2. Hazardous Substances	Adjustable hinges do not contain hazardous substances as defined by Regulation (EC) No. 1907/2006 of the European Parliament and Council of 18 December 2006, Articles 31 and 33 (REACH).
3. Waste	Waste resulting from the use of adjustable hinges (e.g., damaged or worn-out hinges, packaging) does not pose a hazard, provided it is disposed of in accordance with applicable regulations. Proper storage and transport of larger elements should be ensured to avoid damage or injury.
4. Personal Protective Equipment	When installing, adjusting, or dismantling adjustable hinges, personal protective equipment such as protective gloves, safety shoes, and, if necessary, eye and hearing protection should be used in compliance with occupational safety regulations.
5. Adjustment	Before starting the adjustment process, ensure that the hinge is correctly installed and not under load. Avoid using excessive force during adjustment to prevent damage to the mechanism.
6. Recycling	Adjustable hinges can be recycled after disassembly. Metal components should be segregated and sent to collection points for secondary raw materials. All actions should comply with environmental protection regulations.
